	e-mail:	Carsten.Felker@de.manturbo.com

## **Contract Manager, After Sales Service RSD 2**

(for topics related to contract execution)

Mr. Knobba	Tel.:	++49 - 30 - 4301 2148
	Fax:	++49 - 30 - 4301 2909
	e-mail:	Sven.Knobba@de.manturbo.com

## MAN TURBO AG

You placed your order for a MAN TURBO AG product, the performance of which - we hope - will be to your entire satisfaction.

Every machine being subject to a natural wear, it requires a routine attendance and maintenance. To reduce production disturbances due to the failure of power and process engineering units, it is advisable to keep a number of spare parts in stock. In order to assist you in the selection of the required parts, we have compiled a spare parts list with sectional views, prices and delivery periods.

The prices quoted for are valid from DATE OF THE SPARE PARTS LIST. We request your understanding for the necessity that these price will have to be adapted accordingly in case of deviation from this basis of the cost of materials and rates of wages.

The delivery periods stated are not binding, because they depend on the degree of employment prevailing in our shops and on that of our subsuppliers at the time of order.

Parts, for which neither a price nor a delivery period have been stated, should be asked for individually, if required.

In order to facilitate matters for both parties and, thus, the speedy settlement of your orders, you are requested to specify the details stated in the following example in your future enquiries:

MAN TURBO AG mfr. serial no.: **26-1152**

inst in masch	tot. inst	spare parts designation	reference-no. cust. code cust. code 2 material no.
---------------------	--------------	-------------------------	---

1	1	Impeller seals open stage 1	26-1152-2271-62 200355362
---	---	-----------------------------	------------------------------

The spare parts to be supplied will be marked by us accordingly.

When compiling your requirement, you should bear in mind that, for reasons of costs, our minimum invoice value amounts to EUR 150,-. Therefore, it is advisable to place collective spare parts orders and, as regards small parts, to order respective quantities reaching this value.

In conclusion, we should like to call to your mind that the storage of sufficient spare parts and complete assembly groups enables a quick exchange in case of disturbances and, thus, saves you costs.
